

Electronic 7-Day Timer Heaters With RF Receiver

Multi zoning your electronic 7-day timer heating system is now possible with the new custom-built heaters with an RF receiver.

Each heater can be connected to an MRX1 multi zone controller that allows you to change the zone programme individually or as a group.

* Wireless controlled by separately purchased MRX1 controller.

Each heater has the same features and functions as the Electronic 7-day timer heaters.

The range includes:

- PLE-RF panel heaters
- LSTE-RF panel heaters
- CN2MLSTiERF fan heater
- PLSTiE-RF Slimline fan heaters
- WMH3ERF Chelsea 3kW wall mounted fan heater
- HE6137ERF Flowzone 3kW wall mounted fan heater

- **Made to suit specific order requirements ***

Features and Functions

- **PROGRAMMABLE 7-DAY TIMER AND THERMOSTAT**

Offers a programmable 7-day timer with 6 heating periods per day. Each heating period can be set with different temperature setting.

- **OPEN WINDOW DETECTION FEATURE**

Once enabled in the setup menu, the open window detection is fully automatic and does not require any human intervention to be activated.

- **COPY DAY FUNCTION**

A copy day function can be used to duplicate the same set of programmes throughout the week.

- **ELECTRONIC LOCK**

The digital control panel is designed with an electronic lock to prevent tampering with controls.

- **4 OPERATING MODES**

Programme, Boost, Setback and Manual modes.
